

MEMORANDUM

Date: March 27, 1998

To: Wayne Sproles, Project Manager, T893B, X5790

From: A. Clegg Crawford, President, Bldg. 116, X2917

Subject: HEALTH AND SAFETY PLAN FOR TRENCH T-1 - ACC-059-98

Action: Pass on my personal congratulations and thanks to the entire T-1 Team.

I recently received an email message from Kaiser-Hill's Jill Bruse regarding the Health and Safety Plan for T-1. First let me include an excerpt from her message:

"I felt compelled to share with you my conclusion (following review as part of K-H assessment for readiness), that this document (the Health and Safety Plan) is exemplary. The breadth, presentation, and organization are particularly noteworthy. The overall quality of the document is indicative of strong dedication, attention to detail, and a broad based knowledge. It would be a joy to read and assess more documents of this caliber."

Please pass on my sincerest appreciation to the team who put this plan together including but not limited to the following:

Don Barbour, Starmet Project Manager
Greg DiGregorio, RMRS QA
Dave Farler, RMRS IH
Ken Gillespie, RMRS Site Safety Officer
Nick Lombardo, Starmet Project Supervisor
Ruth McCafferty, RMRS IH Lead
Bruce Miller, Starmet Health and Safety Program Manager
John Miller, SSOC Radiological Engineering
Peggy Schreckengast, RMRS IH

If this is indication of the overall success we will have on the project, and I am sure it is, the Source Removal at Trench T-1 will be a project that RMRS and the K-H Team can be very proud of.

Again, please extend my thanks to your team.
